Sir:

PARKHURST & WENDEL

In reply to the Office Action mailed February 26, 2004, applicants elect as a species for examination a compound of formula (2) having a core molecule structure (1-10) wherein each of Ar<sup>5</sup> to Ar<sup>8</sup> is individually a biphenyl group. The claims that read on the elected species are claims 3 to 5 and 13. Claims 8, 10 and 12 do not read on the elected species because of the different A and B definitions in those claims.

The election is respectfully traversed because there is no indicated reason in the record why all claimed subject matter

Serial No. 10/658,417

cannot readily be examined at the same time. Indeed, applicants point out that such subject matter was examined without difficulty in parent application Serial No. 10/913,323.

An early examination of all claims is earnestly solicited.

Respectfully submitted,

PARKHURST & WENDEL, L.L.P.

Charles A. Wendel
